NOTES

- All dimensions are in inches, unless otherwise indicated with tolerances as detailed below
- Sensor body material of construction is CPVC (6X13/6X12), RADEL (6X32), PEEK (6X42), RYTON (6X53/6X54)
- Drawing shown in the standard with protective tines configuration (4 places, 90 degrees apart).  
The 2 protective tines only "GRO" configuration (2 places, 180 degrees apart) is optional.
- In the alternate without tines configuration ("NG") the sensor body is exactly 7.5 inches in length.  
The max displacement for ORP sensing element is 0.1" yielding a max insertion depth of 1.6 inches past threads & overall max length of 7.6 inches.
- Do not use any sensor beyond the factory defined maximum temperature or pressure rating.
